-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 10, 32, and 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Morris (US 6,850,091 B2).

Regarding claim 1, Morris discloses, in Figs 1-2, a signal line termination circuit, comprising:

a software controller for providing a control signal for selectively causing a signal line to be pulled to a voltage level;

a mechanism for permitting the setting of a mode for the signal line, the mechanism receiving the control signal from the software controller and providing an enablement signal; and

a switch for controlling power to the signal line through the enablement signal, the switch being controllable by the mechanism by the transmitted control signal.

Regarding claim 2, Morris discloses, in Figs 1-2, a bus terminator that receives the output signal of the switch.

Regarding claim 10, Morris discloses, in Figs 1-2, that the mechanism is a three point mechanism having a first point (111), a second point (112), and a third point (113).

Claims 32 and 33 are essentially the same in scope as claims 1-2 and are rejected similarly.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-9, 34, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morris.

Morris shows and teaches all the elements and means of the claimed invention as discussed above but does not disclose the limitations recited in claims 3-9, 34, and 35. However, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

***Allowable Subject Matter***

Claims 11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
